Tasks in graphx Models

- 1) * Replace those not appearing in sidebar icons with something effective (may be with .png or .svg files) also selected button from sidebar or should remain in active state like highlighted effect.
- 2) * Customize ~~tools~~ LLMs (Project - Screen)
- 3) * Fine tune LLMs will be the exact copy of the classic mrs Dashboard & Project - screen with those four circles.
- 4) * Let's use that Particular sider in somewhere else (may be in landing page) Projects vi is not suitable, for now it has to be commented.

- 5) * Thinking of include AI Assist box in Project-page like

Cause it looks like this

too much room available so we can separate this AI box from dialog to separate UI element. It will be more useful.

- 6) * Dashboard page with Credits, graph Deployments - looks like shit, we gotta make some improvements. At least the functionalities for everything

The sketch shows a web application layout with the following components:

- Name:** A text input field with the placeholder text "Name your LLM".
- Description:** A text area with the placeholder text "Add a short description about your llm".
- Instructions:** A larger text area with the placeholder text "what do you want your llm to do?" and "multi line input field".
- Knowledge:** A section with a question mark icon and the text "if you upload files here, responses you to include this knowledge as context generate response". Below this is a button labeled "Attach files".
- Deploy:** A prominent button labeled "Deploy".
- Preview:** A section on the right side of the interface, labeled "Preview", which contains a large, empty rectangular area.

when clicked -

An abstract line drawing within a square frame. The drawing consists of several overlapping, swirling, and looping lines that create a sense of movement and depth. The lines are drawn with a dark ink or pencil, and the overall composition is dynamic and non-representational.

try
make it
suit the
dark theme

1) Get Gemini API (Refer youtube)

2) (How to use that API to input a simple msg & get respond through JS function, a simple API call)

3) Build application with prompt engineering to match the Requirements

following

you won't touch it
gemini provides this server

Server
Gemini input
Output:
here The following products are available

Angular application
API call
http://gemini | method = post
{ "input": "you are a customer supporter, now, respond for " what are the products available" }

Show it in UI,

It can be done by fetch() method, (use chatGPT to do this for implementation)
