Now add feature(s)

1) Sentiment Analysis)

before fetch(), the user input
should be analyzed for happy, sad,
angry mood, then alter the
prompt using condition, eg

```
if (sentiment_Analyze(input) == "happy") {
    prompt += "Note, the customer is happy
              about your prev response. so
              engage with similar manner" }

else if (angry)
    prompt += "the customer is angry,
              about your previous response,
              so respond accordingly etc,, )

etc., for other moods
```
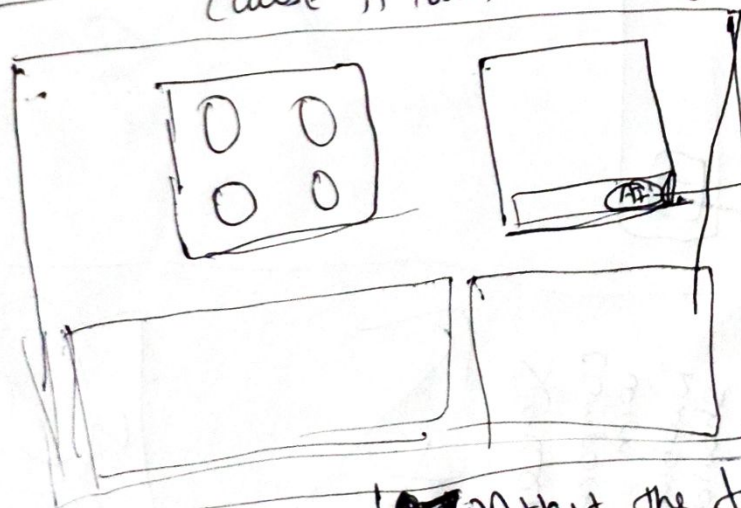

Tasks in graphx Models

1) ✱ Replace those not appearing in sidebar icons with something effective (may be with .png files) also selected button from sidebar or .svg should remain in active state like highlighted effect.

2) ✱ Customize forms LLMs (Project - Screen)

3) ✱ Finetune LLMs will be the exact copy of the classic MLS Dashboard & Project - screen with those four circles.

4) ✱ Let's use that Particular (may be in landing page) slider in somewhere else, for now it has to be projects oi is not suitable, commented.

5) ✱ Thinking of include AI Assist box in project-page like

(cause it looks like this) too much room available so we can separate this AI dge from forms dialog to seperate UI element It will be more useful.

6) ✱ Dash board page with credits graph Deployments ~~(?)~~ Atlast the functionality for everything looks like shit, we gotta make some improvements.

21)

Create

when clicked
same dialog

Name

Name your LLM

Description

Add a short description about your llm.

Instructions

What do you want your llm to do?
